Chapter 1 The Access Protection and Security Driving Instructions *1*

What's This Book Going to Do for You? *1*
The Overall Road Map *4*
Your Personal Driving Instructions *7*
About the Book and the Demonstration Material *10*
Secure Things that You Can Do Now *14*
Does Upgrading Assist in Security? *17*
Further Reading *19*
Security: The Journey Never Ends *20*
What's Next? *22*

Chapter 2 Protecting Your Database with Startup Options *23*

Do I Need to Read this Chapter? *24*
Manually Changing Startup Options *25*
Programming the Startup Options *30*
The AllowBypassKey Property *42*
Using Homemade Accelerator Keys in Restricted Environments *45*
Further Reading *47*
Reflecting on this Chapter *47*
What's Next? *48*

Chapter 3 Using Database Options and Attributes to Protect Data and Objects 49

How Will This Chapter Help Me? 50
The Protection-Related Database Options 52
Hiding Objects in the Database Window 67
Further Reading 79
Reflecting on This Chapter 79
What's Next? 80

Chapter 4 Providing a Solid Foundation with Good Programming Practices 81

Is This Chapter Worth Reading Now? 82
The AutoExec Macro Provides a Flexible Springboard 83
Splitting Your Database to Make It Easier to Protect 87
Error Handling Shields Your Code 97
Further Reading 105
Reflecting on This Chapter 107
What's Next? 107

Chapter 5 Backing Up and Recovering Your Databases 109

What You Must Know About Database Backups and Recoveries 110
Backing Up Multi-User Databases 112
Normal Backups 120
Creating Compressed (.ZIP) Archives 122
Compacting Databases 124
Saving Tables to Text Files 128
Exporting and Recovering Programming Objects 140
Size Does Matter: How the Text Backup Files Will Help 152
Backing Up Other Information 153
Backing Up Your Database by Using Access 2003 156
Further Reading 158
Reflecting on This Chapter 159
What's Next? 159

Chapter 6 User and Object Surveillance 161

Will Surveillance Really Help? 162
The Jet User Roster Form 163
The LDBView Utility 169
The Access Workbench 173
Logging Windows Users, Computers, and Access Accounts 176
Recording When Objects Are Opened 182
Retrieving the Computer Name, Windows User ID, and Access Workgroup ID by Using VBA Code 187
Checking for Users Who Skip the Startup Sequence 191
Further Reading 193
Reflecting on This Chapter 195
What's Next? 196

Chapter 7 Protecting Your Database with Menus and Toolbars 197

Will Menus and Toolbars Help Protect My Database? 198
Building Toolbars, Menus, and Shortcut Menus 199
Integrating Menus into Your Forms and Reports 212
Modifying the Built-In Menus and Toolbars 224
Further Reading 229
Reflecting on This Chapter 231
What's Next? 232

Chapter 8 Developer Workgroup Security 233

Why Is Developer Workgroup Security So Important? 234
The Developer Workgroup File Strategy 240
Preparing Your Developer Workgroup File 245
The Developer Workgroup File Is Ready 254
Securing Your Database with Your Developer Workgroup File 261
One Secure Object Marks a Developer's Territory 262
Transferring Ownership of the Database and All Its Objects 267
Maintaining Object Ownership and Change of Ownership 269
Setting Database Permissions 273
Further Reading 282
Reflecting on This Chapter 284
What's Next? 286

Chapter 9 Security Concerns, Encryption, and Database Passwords 287

What Is It That We Should Be Concerned About? 288
Are Password Retrieval Programs All Bad? 289
Importing Objects from Other Databases 289
Database Encryption 291
Workgroup Security Files 295
Database Passwords 298
VBA Project Passwords 305
Further Reading 305
So What Are the Best Access Security Strategies? 305
Reflecting on This Chapter 306
What's Next? 306

Chapter 10 Securing Data with Workgroup Security 307

What Do I Need to Know About Securing My Data? 308
Trusting Your Workgroup File to Other Users 310
Trusting Your Users by Adopting the Same Workgroup File 318
Opening Databases with Shortcut Files 323
Time for Reflection 330
Security Wizards 333
Securing Data with PID Authentication 345
Protecting Data Outside the Company Network 355
Server-Based Databases 359
Further Reading 360
Reflecting on This Chapter 361
What's Next? 362

Chapter 11 Object Protection and Security Measures 363

Have I Done Enough to Protect the Objects in My Database? 364
A Workgroup Security Refresher 365
Protecting Linked Tables' Paths with Remote Queries 371
Protecting Your Query Design 374
Hiding Your Query (Design) in Forms and VBA Code 376
Protecting Forms by Using VBA Code 377
Protecting Reports by Using VBA Code 381
Protecting Macros by Using VBA Code 382
Protecting VBA Code by Using a Password 382

Using Data Access Pages with Workgroup Security 385
Access Data Projects 390
The MDE Database Format Revisited 391
Further Reading 399
Reflecting on This Chapter 400
What's Next? 401

Chapter 12 Protecting and Securing Your Database with the Operating System 403

Why Is Operating System Security Important for My Database? 404
Overview of Applicable Operating System Security 406
Proof-of-Concept Operating System Security 409
The Access Protected Folder Strategy 427
The All-Important NTFS Format 439
Protecting Against Unattended Computers 441
Issues of Relevance in Windows XP 443
Checklist of Other Security-Related Issues 446
Further Reading 449
Reflecting on This Chapter 450
Is That the End of the Journey? 451

Appendix A Specific Access Security Information 453

Appendix B Registering the Access Workbench 459

Appendix C Why Migrate from Access to SQL Server? 461

What Is Migrating? 462
Access versus SQL Server 464
Reasons to Migrate 469
Reasons Not to Migrate 471
Migration Considerations 472
